

UFCEP4-0-3 Acceptance Test Plan

Hospital Patient Referral, Treatment and Administration System
Initial Release - 28 September 2026

Unit	UFCEP4-0-3 Business Process Modelling and Enterprise Architecture
Submission	Initial Release Presentation supporting file
Project	Hospital Patient Referral, Treatment and Administration System
Purpose	Structured acceptance criteria linked to requirements and business rules
Evidence status	This document is the test plan; execution evidence is assessed later in the portfolio

1. Acceptance Test Plan Scope

This plan defines measurable acceptance criteria for the operational BPMN model. It covers the main workflow, alternative paths, exception paths, and relevant non-functional requirements for the initial release.

2. Acceptance Criteria and Test Scenarios

Criterion ID	Linked Req. / Rule	Acceptance Criterion	Scenario	Preconditions	Test Data	Actions	Expected Outcome	Pass / Fail Condition
AC-01	FR-01, FR-02, BR-01	Medical Secretaries can record a referral and check supporting information without making clinical suitability decisions.	New referral received	User is Medical Secretary	patientId=P001; referralDocs=complete	Start referral process; record referral; check documents	Referral is recorded and moved to Consultant review only after document check	Pass if referral data is saved and no clinical decision option is available to Medical Secretary
AC-02	FR-02, FR-04	If supporting information is missing, the process requests missing information and keeps the referral open.	Missing referral documents	Referral started; documentsIncomplete=true	missingItem=diagnostic report	Mark information incomplete; request missing item; receive additional information	Referral returns to information checking step	Pass if referral does not proceed to Consultant review until required information is received
AC-03	FR-03, FR-04,	An authorised Consultant can	Consultant reviews	Referral documents	decision=Accept/Reject/More	Open Consultant review; choose	Correct route is followed and	Pass if each decision activates

	FR-05	accept, reject, request more information, or redirect a referral and the decision is recorded.	referral	checked	Info/Redirect; reason entered	decision; submit reason	decision maker/reason are stored	the correct process path and audit data exists
AC-04	FR-06	A New Patient Appointment cannot be arranged before Consultant acceptance.	Attempt appointment before acceptance	Referral status is not Accepted	referralAccepted=false	Try to start booking process	Booking is blocked or remains unavailable	Pass if appointment booking cannot start before accepted referral
AC-05	FR-07, FR-08, FR-09	The Outpatient Bookings Team can receive an accepted referral, search scheduling service, and confirm a suitable appointment.	Accepted referral with available slot	Referral accepted	speciality=oncology; priority=urgent; slotAvailable=true	Start appointment process; search slot; confirm appointment	Appointment is confirmed in system	Pass if appointmentDate and booking status are recorded
AC-06	FR-10, FR-11	Appointment letter is sent, and telephone contact is also required when appointment is within two weeks.	Appointment within 14 days	Appointment confirmed	appointmentWithinTwoWeeks=true	Send appointment letter; evaluate two-week gateway	Telephone Patient task is created after letter is sent	Pass if both letter and telephone contact are required
AC-07	FR-12, FR-13	Each telephone contact attempt and outcome is recorded, including no answer, wrong number and rescheduling.	Telephone contact unsuccessful or changed	Telephone task active	contactOutcome=No Answer/Wrong Number/Reschedule	Record contact outcome	Correct alternative path is activated	Pass if outcome, date/time and next action are stored
AC-08	FR-13	If no suitable appointment is available within the requested timeframe, the case is highlighted rather than silently booked outside the timeframe.	No slot available	Accepted referral; requested timeframe exists	slotAvailable=false	Search scheduling service	No-slot route activates and case is highlighted/escalated	Pass if system does not confirm an unsuitable appointment
AC-09	FR-14, FR-15	Only complete and	Unauthorised	Patient attended	authorised=false	Submit	Administrative	Pass if Treatment

		authorised Treatment Booking Requests are processed.	treatment request	appointment		incomplete/unauthorised treatment request	processing is blocked or request is returned	Bookings Team cannot process unauthorised request
AC-10	FR-16, FR-17	If an external treatment/lab/imaging service is unavailable, booking remains pending and no duplicate appointment is created.	External service unavailable	Authorised Treatment Booking Request exists	externalServiceAvailable=false	Check resource availability twice	Request remains pending and retry is recorded	Pass if no duplicate treatment appointment is created
AC-11	FR-18, FR-19	Only authorised clinical professionals can decide whether treatment continues, is delayed or modified, and modifications use a formal request.	Treatment review decision	Treatment cycle completed	decision=Modify	Clinical professional submits modification	Formal Treatment Modification Request is created	Pass if non-clinical roles cannot create clinical decision and modification is traceable
AC-12	FR-20	The system determines whether treatment is hospital funded, insurer funded or patient paid before confirmation where required.	Funding check	Treatment appointment pending confirmation	fundingType=Insurer	Open funding check; select funding source	Correct funding route is followed	Pass if treatment is not confirmed until required financial condition is satisfied
AC-13	FR-21, FR-22, NFR-05	Patient payment is sent securely to external Payment Service Provider and payment result is recorded without storing full card details.	Patient payment success	Payment required	amount=500; paymentStatus=Successful	Send payment request; receive payment response	Payment reference, date, amount and status are recorded	Pass if full card number is not stored and payment result exists
AC-14	FR-22, FR-23	Declined, cancelled, incomplete or uncertain payments are handled without duplicate booking or duplicate charging.	Payment confirmation lost	Payment required	paymentStatus=Unknown; providerTimeout=true	Run payment worker; simulate lost confirmation	Transaction is marked for investigation, not automatically repeated	Pass if no second charge is triggered automatically

AC-15	FR-24	Authorised Finance Team staff can approve and process full or partial refunds and record the result.	Treatment cancelled after payment	Successful payment exists	refundRequired=true ; refundType=partial	Finance reviews refund; send refund request	Refund result is recorded against patient account	Pass if refund requires authorised finance action
AC-16	FR-25, FR-26	Every enquiry is recorded, classified, prioritised and routed; clinical enquiries go to authorised clinical staff.	Clinical patient enquiry	Enquiry received	enquiryType=Clinical; priority=High	Record enquiry; classify; route	Enquiry is routed to clinical team/CNS	Pass if call handler cannot complete clinical advice response
AC-17	FR-27, FR-28	Clinic Letters are created and approved by Consultant before Medical Secretary performs administrative checks and distribution.	New Patient Clinic Letter	Consultation completed	letterStatus=Draft	Consultant writes and approves letter; Medical Secretary checks recipients	Approved letter is distributed	Pass if unapproved letter cannot be distributed
AC-18	FR-29, FR-30, FR-31, FR-32	Delayed Clinic Letters are monitored with weekly reminders and escalated after one month and three months; reminders stop after completion.	Overdue Clinic Letter	Letter incomplete after appointment	daysOutstanding=35	Run monitoring cycle	Reminder and Administrative Manager escalation occur	Pass if escalation is correct and reminders stop after completion
AC-19	NFR-01, NFR-02, NFR-03	The system authenticates users and restricts access by role.	Role-based access check	Users with different roles exist	role=Finance; clinicalRecordAccesses=attempted	Attempt to access unauthorised clinical action	Access denied	Pass if user only sees actions/data required for their role
AC-20	NFR-06, NFR-07, NFR-08, FR-91	Significant actions are recorded in an audit trail containing user, date, time and action, and ordinary users cannot edit it.	Audit trail check	Process instance completed	action=appointment change	Perform action; inspect audit record; try ordinary edit	Audit record exists and is not editable by ordinary user	Pass if audit record is complete and protected

3. Requirement Coverage Summary

Area	Acceptance Criteria Covered
Referral & Consultant Review	AC-01 to AC-04
Appointment & Patient Communication	AC-05 to AC-08
Treatment & Chemotherapy	AC-09 to AC-11
Funding / Payment / Refund	AC-12 to AC-15
Enquiry / Clinic Letter / Monitoring	AC-16 to AC-18
Security / Audit / Traceability	AC-19 to AC-20

4. Pass / Fail Recording Template
